

## National Multiple Sclerosis Society Daniel Haughton Senior Faculty Award

**Grantor:** National Multiple Sclerosis Society

**Closes:** 8/14/2009

**Maximum:** \$0.00

National Multiple Sclerosis Society Daniel Haughton Senior Faculty Award

Ending MS will require a cadre of well-trained scientists engaged in MS-related research. Named for a member of the Board of Directors of the National MS Society who displayed a special interest in MS research, the Daniel Haughton Senior Faculty award addresses this need by providing support to established investigators for specialized training in a field which they are not currently expert, to enhance their capacity to conduct research related to MS. Awards of this type, which are available annually, can be used for sabbatical support for qualified individuals.

Before submitting a proposal for fellowship support, the investigator must consult the Research & Clinical Programs Department by phone or email to determine whether the research plan is appropriate and relevant to the mission of the Society.

**Deadline:** August 14, 2009
