

Dermatopathology Fellowship

Grantor: Boston University School of Medicine

Closes: 10/1/2010

Maximum: \$0.00

Dermatopathology Fellowship

Dermatopathology Fellowship Training Program

Description: This two-year fellowship program is geared to prepare individuals for an academic career in Dermatopathology in the US. Training in diagnostic dermatopathology is founded on our volume of over 30,000 accessions per year, which include consultations on previously prepared slides, and thus a high proportion of challenging material. Fellows see all or some of the cases prior to their being signed out by an attending. Ancillary diagnostic training is available in immunoperoxidase techniques and molecular biology. Research opportunities include clinicopathologic studies, immunoperoxidase, ultrastructural and molecular biologic investigation of aspects of skin disease.

Program details: The first year provides time for fellows to pursue a research project in depth while the second offers extensive experience in practical Dermatopathology. The first and last quarter of the second year in training will be spent exclusively in Dermatopathology, interspersed by a 6-month rotation in either clinical dermatology (for pathology-trained residents) or in surgical pathology (for dermatology-trained residents). Dermatopathology training will continue during these clinical dermatology/surgical pathology rotations. The fellow will be expected to actively participate in all teaching activities throughout the years in training.

Stipend: Commensurate with PGY level.

Requirements: Applicants must be board eligible/certified in pathology (AP, AP/CP) or dermatology.

Deadline: The next available position begins July 1, 2012.

Completed application deadline: October 1, 2010.

Program Director: Meera Mahalingam, MD, PhD, FRCPath
Professor of Dermatology and Pathology and Laboratory Medicine
Dermatopathology Section, Department of Dermatology
Boston University School of Medicine
609 Albany Street, J-301, Boston, MA 02118
