

## **Conference Student Scholarships: Neurodegenerative Diseases: The Molecular and Cellular Basis for Neurodegeneration**

**Grantor:** Keystone Symposia

**Closes:** 10/20/2010

**Maximum:** \$1,000.00

Conference Student Scholarships: Neurodegenerative Diseases: The Molecular and Cellular Basis for Neurodegeneration

Scholarship Deadline: October 20, 2010 (Midnight US Mountain Standard Time)

Neurodegenerative diseases are chronic age-dependent progressive disorders that are substantial and growing health problems, which exert a tremendous toll on the patient, family, health system and society as a whole. Accordingly, there is an urgent need to identify therapies that slow and/or reverse the progression of these disorders. Research in neurodegenerative disorders is providing tremendous advances in the molecular understanding of these disorders. New insights in cell biology, biochemistry, genomics and proteomics into these illnesses are leading to mechanism based therapies and new tools and biomarkers to study disease progression and therapeutic efficacy. In this meeting an emphasis will be placed on understanding new molecular and common mechanisms of disease in Alzheimer's disease (AD), Parkinson's disease (PD), triple repeat diseases, frontotemporal lobar dementia and others.

Keystone Symposia is offering scholarships to students and post-docs this conference season. These scholarships, of up to \$1000 each, are to be used to help defray the expenses associated with conference attendance, including air (on a U.S. air carrier), ground transportation and lodging costs. Receipts will be required to receive reimbursement.

Abstracts submitted for poster presentation will be used as the basis for awarding the scholarships. Conference organizers will select the scholarship recipients based on the quality of science of the abstract and the relevance of the abstract to the conference topic. Only one application per abstract is accepted.

Keystone Symposia  
221 Summit Place #272
