

Conference Student Scholarships: HIV Evolution, Genomics, and Pathogenesis

Grantor: Keystone Symposia

Closes: 11/22/2010

Maximum: \$1,000.00

Conference Student Scholarships: HIV Evolution, Genomics, and Pathogenesis

Scholarship Deadline: November 22, 2010 (Midnight US Mountain Standard Time)

Elucidating the molecular mechanisms of HIV pathogenesis relies on understanding the complex interplay between the virus and its host. Increasingly, the field is relying on the power of comparative studies of similar viruses in other species, and on whole genome analyses to elucidate which pathways are critical. The use of evolutionary analyses of both host and virus is also providing novel insights into viral transmission and innate immune responses. This Keystone Symposia meeting will use diverse disciplines to promote further insights into the dynamic interplay between the virus and the host in areas of pathogenesis, mucosal biology, the roles of viral and host genes, and viral latency. Understanding these issues is critical for the design and development of an effective vaccine and the next generation of antiviral agents.

Keystone Symposia is offering scholarships to students and post-docs this conference season. These scholarships, of up to \$1000 each, are to be used to help defray the expenses associated with conference attendance, including air (on a U.S. air carrier), ground transportation and lodging costs. Receipts will be required to receive reimbursement.

Abstracts submitted for poster presentation will be used as the basis for awarding the scholarships. Conference organizers will select the scholarship recipients based on the quality of science of the abstract and the relevance of the abstract to the conference topic. Only one application per abstract is accepted.
