

UltraEcho, Ltd. Cardiovascular Sonographer Student Travel Grant

Grantor: American Society of Echocardiography

Closes: 11/30/2010

Maximum: \$1,000.00

UltraEcho, Ltd. Cardiovascular Sonographer Student Travel Grant

The American Society of Echocardiography Foundation is pleased to announce the availability of a travel grant for sonography students enrolled in a cardiac ultrasound program. The travel grant program is designed to provide partial financial support to sonography students who would otherwise be unable to attend ASE's Annual Scientific Sessions; or any other ASE directly sponsored or sponsored educational course. ASEF thanks UltraEcho, Ltd. for funding the program.

To apply for this travel grant, you must:

Be actively enrolled in a cardiac ultrasound program accredited by CAAHEP (U.S.) or by an equivalent Canadian or international* ultrasound program at the time of the grant selection (April 2009). *International candidates will need to submit information describing equivalency of program to CAAHEP standards and/or course work that follows the National Education Curriculum for Sonography (NEC). This travel grant is based on financial need. Award Amount: \$1,000.

Applicant Selection: While any sonography student actively enrolled in a CAAHEP ultrasound program may apply for this travel support, the selection process will give preference to students without sufficient travel funding who would not otherwise be able to attend an ASE sponsored educational course. Deadline for receipt of the 2011 travel grant - November 30, 2010.
