

## Conference Student Scholarships: Immunoregulatory Networks

**Grantor:** Keystone Symposia

**Closes:** 12/1/2010

**Maximum:** \$1,000.00

Conference Student Scholarships: Immunoregulatory Networks

Scholarship Deadline: December 1, 2010 (Midnight US Mountain Standard Time)

Immunoregulatory networks play a pivotal role in preventing autoimmunity, but also restrict anti-tumor immunity and modulate immune responses to pathogens. While regulatory T cells (Tregs) are a central component of this network, there is now the growing realization that there are many other cellular and molecular components that contribute to this network. While this will be a Treg-centric meeting, it will also focus on how Tregs integrate with other cellular and molecular components to prevent autoimmunity and control immune responses. This meeting will dissect our current understanding of four key areas: development and homeostasis of regulatory populations, molecular control of immunoregulatory networks, mechanisms of regulatory function and regulatory T cell plasticity. A second goal will be to discuss how Tregs interact with different cell types or utilize different cytokines that modulate or indirectly mediate their activity. A third goal will be to assess how the advances presented can be utilized to develop novel therapies for autoimmune disease and cancer.

Keystone Symposia is offering scholarships to students and post-docs this conference season. These scholarships, of up to \$1000 each, are to be used to help defray the expenses associated with conference attendance, including air (on a U.S. air carrier), ground transportation and lodging costs. Receipts will be required to receive reimbursement.

Abstracts submitted for poster presentation will be used as the basis for awarding the scholarships. Conference organizers will select the scholarship recipients based on the quality of science of the abstract and the relevance of the abstract to the conference topic. Only one application per abstract is accepted.
