

Summer Undergraduate Research Fellowships

Grantor: Michigan State University

Closes: 3/15/2010

Maximum: \$3,500.00

Summer Undergraduate Research Fellowships

March 15, 2010 Application Deadline

Each SURF Program student receives a stipend of \$3,500.

The Summer Undergraduate Research Fellowship Program is for undergraduate students considering a research career in pharmacology and toxicology.

The program provides an excellent opportunity for students to become immersed in a research project using cutting-edge techniques to address an important health-related question.

Students earn a stipend while working on their project full-time for a 10-12 week period in the summer beginning in mid-to late-May. Students produce data which will be presented at state, national and international scientific meetings and may be published in peer reviewed articles - with the student as an author.

And it's fun, too!
