

## Renal Discoveries Extramural Grant Program

**Grantor:** Baxter

**Closes:** 4/15/2010

**Maximum:** \$0.00

### Renal Discoveries Extramural Grant Program

RENAL DISCOVERIES Extramural Grant Program (EGP), awards grants for innovation, exploration and application of research to advance the knowledge of renal insufficiency and its treatment.

The objective of RENAL DISCOVERIES, EGP is to stimulate and support research in the fields of dialytic therapies chronic kidney disease, and co-morbidities associated with end-stage renal disease (ESRD), with the goal of improving the quality of life and reducing mortality of patients with kidney disease.

An independent international Medical Advisory Board (MAB) - whose membership represents a breadth of scientific knowledge - will evaluate and score each application based on the merit of the submitted proposals as described below. RENAL DISCOVERIES, is a global program that accepts research applications from all regions of the world.

Letter of Intent Due: April 15, 2010
