

American Academy of Child Adolescent Psychiatry Pilot Research Award for Learning Disabilities

Grantor: American Academy of Child Adolescent Psychiatry/Elaine Schlosser Lewis Fund

Closes: 5/7/2010

Maximum: \$15,000.00

American Academy of Child Adolescent Psychiatry Pilot Research Award for Learning Disabilities

Request for Applications - Deadline: May 7, 2010

The AACAP Pilot Research Award for Learning Disabilities, supported by The Elaine Schlosser Lewis Fund, offers \$15,000 for child and adolescent psychiatry residents and junior faculty who have an interest in beginning a career in child and adolescent mental health research. By providing one award to a child and adolescent psychiatry junior faculty member or resident for pilot research on learning disabilities, we support a young investigator at a critical stage, encouraging a future career in child and adolescent psychiatry research. The recipient has the opportunity to submit a poster presentation on his or her research for the AACAP's 58th Annual Meeting in Toronto, Ontario, Canada, October 18 – 23, 2011 and present at the Elaine Schlosser Lewis Luncheon. The award also includes the cost of attending the AACAP Annual Meeting for five days and a speaker training session.

Award Requirements

Candidates must be board eligible/certified in child and adolescent psychiatry, or enrolled in a child psychiatry residency or fellowship program.

Candidates must have a faculty appointment in an accredited medical school or be in a fully accredited child and adolescent psychiatry clinical research or training program.

At the time of application, candidates may not have more than two years experience following graduation from residency/fellowship training.

Candidates must not have any previous significant, individual research funding in the field of child and adolescent mental health. These include the following: NIMH/NIH Funding (Small Grants, R-01) or similar foundation or industry research funding. Candidates who have received or are currently receiving "T32" funding support are eligible to apply.

Candidates must either be AACAP members or have a membership application pending (not paid by the award) and agree to submit a poster presentation on his or her research for the AACAP's 58th Annual Meeting in Toronto, Ontario, Canada, October 18 – 23, 2011 and present at the Elaine Schlosser Lewis Luncheon.

Application Guidelines

Application form

A letter of intent, no more than seven pages (Single spaced, no less than 12 pt. font), including four pages of research protocol, a one page detailed project timeline, one page budget and justification, and one page addressing the inclusion or exclusion of women and minorities.

The research protocol should include the following sections: significance and specific aims, hypotheses, background and rationale, and a research plan (including data analysis plan). Research may be pre-clinical, epidemiological, or clinical.

The detailed project timeline should list tentative dates of all procedures for the proposed research project. These include but are not limited to: data collection processes, analysis of results, and final report writing.

The budget should contain sufficient detail so that each item can be separately judged. Computer related items (e.g., personal computers, printers, modems, etc.) are extremely unlikely to receive budget approval. No salary support for the principal investigator will be provided. No indirect costs for the institution will be provided. Typical budget items may include but are not limited to: subject honoraria and travel expenses, instrumentation costs, assay and lab test costs, and/or payment to research assistants.

If women or minorities will not be included, detailed justification of the rationale for their exclusion is mandatory. Such exclusion may lower enthusiasm for the proposal.

A letter of support from section chief or department chair.

A letter of support from the proposed mentor.

Candidate's current curriculum vitae.

Letter detailing any current research funding (role on project, title, type of project, and source of funds).

(Human and Animal Subjects must be verified at time of award and do not need to be included with the application.)

Program Format

The award recipient is encouraged to work with a child and adolescent psychiatric investigator with expertise in his or her particular area of interest. Work must be completed within one year of receipt of the award. Submission of the pilot data is due on or before June 2011. Any unused funds must be returned to the AACAP.

AACAP has the right to waive informalities.

Application Deadline

All completed applications and attachments must be submitted by May 7, 2010. Electronic materials should be sent to asommer@aacap.org.

If you need to mail any additional attachments, please submit them to the following address. Please note all application requirements (application and attachments) must be submitted/postmarked by May 7, 2010.
