

## American Orthopaedic Society for Sports Medicine Career Development Award

**Grantor:** American Orthopaedic Society for Sports Medicine

**Closes:** 7/1/2010

**Maximum:** \$50,000.00

American Orthopaedic Society for Sports Medicine Career Development Award

AOSSM offers a \$50,000 per year supplement grant to sports medicine orthopaedic surgeons who receive a Career Development Award (K Award) from NIH. The purpose of this grant is to facilitate the research careers of orthopaedic surgeons who have completed training in sports medicine and who have or have accepted a faculty position at an academic institution. Although the grant may be most attractive to researchers early in their careers, the award is open to individuals regardless of time since training. Applicants must first obtain an NIH Career Development (K) Award and have an active award to be eligible. To apply for the supplement, please send a copy of your letter of award from NIH along with your NIH Biosketch and the Career Development Plan from your NIH application, to Bart Mann at [bart@aossm.org](mailto:bart@aossm.org). Deadline for submission is July 1st each year.

For more information, contact Bart Mann, [bart@aossm.org](mailto:bart@aossm.org) or at the AOSSM office, 847-292-4900.

American Orthopaedic Society for Sports Medicine 6300 N. River Road Suite 500 Rosemont, Illinois 60018
