

Harry Weaver Neuroscience Scholar Awards

Grantor: National Multiple Sclerosis Society

Closes: 8/13/2010

Maximum: \$0.00

Harry Weaver Neuroscience Scholar Awards

Harry Weaver, Ph.D., known worldwide for his contribution to neurosciences and multiple sclerosis research, was the Society's Director of Research from 1966-1977. Throughout his tenure with the Society and throughout his career, Dr. Weaver continued to encourage young investigators to enter and pursue MS research, and to broaden our understanding of basic and clinical aspects of MS. In recognition of Dr. Weaver's contribution to the neurosciences and MS research, and to his dedication to young researchers, the Society named this prestigious Award in his honor.

A limited number of awards are offered to highly qualified candidates who have concluded their research training and begun academic careers as independent investigators in an area related to multiple sclerosis. The awards are designed to provide salary and grant support for a five year period, thus permitting the awardee to establish competence in his/her chosen research area. Application must be made jointly by a candidate and the institution in which an appointment is held. Before submitting a proposal for research support, the investigator must consult the Research & Clinical Programs Department by phone or email to determine whether the research plan is appropriate and relevant to the mission of the Society.

Deadline: August 13
