- * Award Amount: \$50,000/year (maximum \$100,000/two years)
- * Apply via Proposal Central website

Proposal Central website tip: filter the list to show Epilepsy Foundation programs

The Research Grants Program stimulates epilepsy research by providing funding for investigators in the early stages of their careers. Seed grants are awarded to clinical investigators or basic scientists for support of biological or behavioral research which will advance the understanding, treatment, and prevention of epilepsy. Applications from established investigators (Associate Professor level or above) and those that are PIs or co-investigators on major federal grants (e.g. RO1 from NIH) are ineligible.
