

International Association for Dental Research Pharmacology/Therapeutics/Toxicology Research Award

Grantor: International Association for Dental Research

Closes: 9/3/2010

Maximum: \$3,500.00

International Association for Dental Research Pharmacology/Therapeutics/Toxicology Research Award

Supported by Wyeth Consumer Healthcare

Established by the IADR PTT Group, and supported by Wyeth Consumer Healthcare, this award recognizes contributions to the understanding of the mechanisms, efficacy, and safety of drugs used to treat dental disease and associated symptoms such as pain and peri-operative apprehension. In practice, this encompasses basic and clinical pharmacology studies of analgesics, anesthetics, sedatives, fluorides, and other drug classes used by dentists. The Award is made for outstanding and sustained peer-reviewed research that has contributed to our knowledge of the mechanisms, efficacy, or safety of drugs used in dentistry.

We thank Dr. Stephen Cooper, Senior Vice President at Wyeth Consumer Healthcare, for his continued support.

IADR Distinguished Scientist Awards

The deadline for nominations is 11:59pm (HST) on Friday, September 3, 2010.

Begin a Submission: <http://dsa.confex.com/dsa/dsa2011/awards/papers/index.cgi>

Login to a previously begun submission: <http://dsa.confex.com/dsa/dsa2011/login.htm>

About:

The Science Awards Committee has the responsibility of selecting awardees from among the nominations of renowned scientists submitted by Association members. The Committee consists of the Science Awards chair and the subcommittee chair for each award. The subcommittee members are composed of the previous award recipients. Appointments are made annually for a period of five years on a rotation basis. Any IADR member may nominate a candidate for a science award. Once a nomination is made, it is considered each year for five years unless the nominee is selected for an award during this period. After the fifth year, the nomination is withdrawn unless a re-nomination is received.

Eligibility:

Science Awards subcommittees are composed of previous winners of the awards; therefore, subcommittee members may not be nominated again for the same award. Members of Science Awards subcommittees may be nominated by another subcommittee. Subcommittee members who have been appointed by the IADR President-elect and who have not already

received their subcommittee's award may be nominated for any award; however, appointees must resign if nominated for the award of the subcommittee on which they currently serve.

ONLY IADR members may be nominated.

Posthumous nominations are not acceptable.

Nomination of an individual for more than one award in the same year is discouraged.

No person should be awarded two IADR Science Awards for the same research, with the exception of the Edward H. Hatton and Young Investigator Awards. Any nominations for a second award must include written evidence that the nomination is for work in a different field of research.

Nomination of current IADR and Division Officers is discouraged.

All nominations made within the past five years must be reconsidered in the current selection unless the nominee was selected for an award.

Procedures:

Any IADR member may nominate a candidate for a science award. All nominations must be submitted via the online system.

The following information **MUST** accompany each nomination and submitted electronically.

Only nominations submitted online will be accepted.

1. Short statement (no more than 700 words) describing the reasons you are nominating the individual for the particular award; and
2. Curriculum vitae

name,

address,

date and place of birth,

education,

honors,

employment,

membership in professional organizations,

bibliography, and

summary of specific scientific contributions of the candidate.

Award: The award consists of a \$3,500 cash prize and a plaque presented at Opening Ceremonies of the IADR General Session & Exhibition.
