

Focused Ultrasound Surgery Foundation Research Awards

Grantor: Focused Ultrasound Surgery Foundation

Closes: 10/1/2012

Maximum: \$100,000.00

Focused Ultrasound Surgery Foundation Research Awards

Full proposals are accepted on a rolling basis but **MUST** be received on or before the quarterly submission deadline* if they are to be considered for the next funding cycle.

*Submission Deadlines: July 1, October 1, January 3, April 1

Successful applicants will normally be funded up to \$100,000 for one year. Larger projects and longer funding periods may be considered for exceptional proposals. Awards are made contingent upon the availability of funds.

Award funds may only be used to support the direct costs of research. Award funds **MAY NOT** be used to cover institutional overhead or indirect costs. Allowable costs include salary for the principal investigator and for scientific and/or clinical research personnel directly involved in the research project, consumable supplies and animals, costs associated with data collection and analysis, IRB review fees and travel related to the conduct of the research or for the purpose of presenting the results of the research at scientific or medical meetings.

It is considered advantageous if institutional/departmental support and/or support from other sources—such as the NIH, foundations, or other philanthropic organizations—is available for the research project for which Focused Ultrasound Surgery Foundation funding is requested.
