

## **Call for Applications: 2012 National Science Foundation Research Experiences for Undergraduates Program in the Chemical Sciences at the University of Michigan**

**Grantor:** University of Michigan

**Closes:** 2/10/2012

**Maximum:** \$4,000.00

Call for Applications: 2012 National Science Foundation Research Experiences for Undergraduates Program in the Chemical Sciences at the University of Michigan

Applications for 2012 are open

Dates for the 2012 Domestic REU: Wednesday, May 30 - Tuesday, Aug 7, 2012

Application deadline for the summer of 2012: Friday, February 10, 2012

The Domestic REU Program is not open to U-M undergraduate students.

REU programs are only open to US citizens or permanent (green card) residents.

University of Michigan REU in the Chemical Sciences

We generally receive about 250 applications for our program each year. You will receive an automatic notification when you submit your application, along with a file number to give your recommenders. If you do not hear from us, you may assume that your application is complete. We will contact individuals whose files are incomplete.

REU Projects: are available in all subject areas. Please see the Chemistry department website for general areas of faculty interests. You may assume that every member of the faculty is interested in hosting an REU student.

In addition to a research project, there will be other activities, including field trips, meetings of all our summer students, weekly group meetings, and a poster session.

Notice to European students participating in the NSF/ACS/DAAD/ECTN program: We are excited to welcome your application to spend the summer in Ann Arbor. Please indicate your interest in the University of Michigan's REU program to host your visit to the US when you apply through the ACS site: [www.acs.org/ireu](http://www.acs.org/ireu).

All REU Fellowships include: \$4000 stipend, housing, and travel. All students receive internet access to their existing home university/college e-mail account. You should ensure that you are covered by an appropriate health insurance policy in order to participate in a summer research program.

For questions, contact Prof. Brian P. Coppola, Program Director: [bcoppola@umich.edu](mailto:bcoppola@umich.edu)

Selection of participants:

Offers are made via e-mail only.

Only the selected and accepted applicants will be announced. Because of the large number of applications we receive, we do not contact applicants who have not been accepted to the program.

We use a rolling acceptance, and make offers to a greater number of students than we have spots for because many students have applied to multiple schools. Under no circumstance should you accept an offer from an REU program unless you are committed to that program. When you say ‘yes’ to a position in a professional setting, you should mean it.

In general, you have a week or two to make up your mind. By all means, you should contact other programs to which you have applied with this offer, if you have decided there are programs whose offer you will take over ours.
