

## Chemical Heritage Foundation 2012-2013 Long and Short Term Fellowships

**Grantor:** Chemical Heritage Foundation

**Closes:** 2/15/2012

**Maximum:** \$45,000.00

Chemical Heritage Foundation 2012-2013 Long and Short Term Fellowships

Applicants must submit the online application form and the following mandatory materials combined into one .pdf attachment by February 15, 2012:

a cover letter introducing yourself and your research project

a copy of your CV (3 pages or less)

a description of your project (less than 1,500 words)

Generous pre- and postdoctoral fellowships are available for research on the history of chemistry, broadly construed. Fellowships are available for periods of 2 to 9 months and will be spent in residence at CHF in Philadelphia. Travel grants are available for shorter research projects.

Projects funded in the past range from the history of Arabic alchemy and agricultural improvement to nanotechnology, pharmaceutical industry, and trans fats. Research proposals detailing the importance of CHF's wide-ranging collections for the proposed project will be considered with particular care.

CHF offers several long-term fellowships for scholars studying the history and sociology of the chemical and molecular sciences, technologies, and industries. Long-term fellows are in residence at CHF for the entire academic year (September–May). All long-term fellows are provided with a private office, a computer, and a direct telephone line.

There are two kinds of long-term fellowships: one for postdoctoral scholars and one for Ph.D. candidates at the dissertation stage.

### Postdoctoral fellowships

Applicants for postdoctoral fellowships must have their Ph.D. in hand before the July prior to the start of the fellowship. Postdoctoral fellowship stipends are \$43,000 paid in biweekly installments. A \$2,000 research allowance is provided in addition to the stipend.

### Dissertation fellowships

Applicants for dissertation fellowships must be graduate students whose Ph.D. dissertations have been accepted by their respective university departments. Dissertation fellowship stipends are \$25,000 paid in biweekly installments. A \$1,000 research allowance is provided in addition to the stipend.

## Short-Term Fellowships

CHF offers several short-term fellowships for researchers studying the history and sociology of the chemical and molecular sciences, technologies, and industries. Short-term fellows are in residence at CHF for periods ranging from two to four months, according to their allocated fellowship.

The short-term fellowship year begins in September and ends the following August. Short-term fellows are allocated a carrel in the Othmer Library's reading room. Wireless Internet access is available in the reading room.

## CHF Short-Term Fellowships

Short-term fellowships are available to researchers whose work requires use of the collections housed at CHF. Stipends are \$3,000 per month. No additional research or travel allowances are available.

## Société de Chimie Industrielle (American Section) Fellowship

The Société Fellowship is a special short-term fellowship for individuals whose work benefits public understanding of the heritage of the chemical industries. Applications are encouraged for multimedia projects, popular book and magazine publications, and Web-based projects. Applicants must specify how the outcome of their proposed projects will reach a broad audience. Only one Société Fellowship is available per year.

Société Fellows are in residence at CHF for three months during a given academic year or during the following summer. The stipend for the three months is \$10,000 paid in biweekly installments. No additional funds are available for research or travel. There may be an opportunity for the Société Fellow to present work at a regular Société meeting in New York City.

This fellowship is supported by an annual gift from the Société de Chimie Industrielle (American Section).

## Glenn E. and Barbara Hodsdon Ullyot Scholarship

The Ullyot Scholarship aims to advance the public understanding of the importance of chemistry and related sciences to the public welfare by supporting graduate or postdoctoral research into the history of chemistry and related sciences. Applications are encouraged for educational media and Web-based projects as well as popular book and magazine publications. Applicants must specify how the outcome of their proposed projects will reach a broad audience. Only one Ullyot Scholarship is available per year.

Ullyot Scholars are in residence at CHF for two months during a given academic year or during the following summer. The stipend for the two months is \$6,000 paid in biweekly installments. No additional funds are available for research or travel.

The Ullyot Scholarship is made possible through the generosity of Glenn E. and Barbara Hodsdon Ullyot.
