

International Essential Tremor Foundation Grant Program

Grantor: International Essential Tremor Foundation

Closes: 2/28/2012

Maximum: \$0.00

International Essential Tremor Foundation Grant Program

The IETF grant program provides funds to members of the scientific community who submit proposals that address the nosology, etiology, pathogenesis, treatment or other topics relevant to essential tremor (ET).

The aim of program is to stimulate inquiry into this poorly understood clinical disorder and to provide support to projects that are innovative and give promise of receiving more substantial support from NIH, K Award, R01 and/or other sources if sufficient preliminary information can be obtained from projects supported by the IETF. Preference will be given to individuals who do not currently have any R01 support from NIH.

The IETF would very much like to encourage anyone interested to submit a proposal.

Proposals can be submitted between November 1 and February 28 each year.

Questions regarding research funding or grant submission should be directed to Catherine Rice, Executive Director, at 913.341.3880 or email at crice@essentialtremor.org
