

Pediatric Radiology Pilot Award

Grantor: Society for Pediatric Radiology

Closes: 3/15/2012

Maximum: \$50,000.00

Pediatric Radiology Pilot Award

The deadline for receipt of applications is March 15.

In response to surveys of the membership, surveys of past grant recipients and SPR Board discussions, in February 2010, the SPR Research and Education Foundation established the Pediatric Radiology Pilot award.

This new grant award is designed to provide a higher level of support for pediatric radiology-related projects of merit.

This grant can be used to fund protected time.

Amount – up to \$50,000.

Funding will be based on merit, including expertise and available resources, but should also endeavor to focus on unique aspects of imaging or image-guided therapy/intervention in children, promote the importance of imaging or imaging expertise in improving health care in children, embrace broader cross boundary impact, including public policy or translational medicine, cultivate multidisciplinary cooperation, and provide opportunities for additional funding

Beginning in 2011, SPR Seed and Pilot grants will be applied for using the Common Application through the IORC website: www.radresearch.org.

To begin:

Go to www.radresearch.org

Select Common Application from the Navigation menu on the left

If you are not already registered, register your name and password

Select the desired Grant Program

Print the Instructions from the page

Begin completing the form
