

American Society for Radiation Oncology Junior Faculty Career Research Training Award

Grantor: American Society for Radiation Oncology

Closes: 3/29/2012

Maximum: \$200,000.00

American Society for Radiation Oncology Junior Faculty Career Research Training Award

This award was created to stimulate interest in radiation research early in junior faculty's careers by offering them the opportunity to have focused time for research projects in radiation oncology, biology, physics or outcomes/health services.

You are eligible if:

You are a board-eligible physician or physicist in radiation oncology or a radiobiologist within the first three years of your junior faculty appointment.

Your institution is recognized as providing a rich environment for career development and possesses qualified faculty in clinical, translational or basic research to serve as mentors.

You have found a primary mentor who, together with you, is responsible for the planning, direction and execution of the program.

In addition, the mentor and a responsible member of the institution/department must demonstrate, in writing, a commitment to your development as a productive, independent investigator.

Each year, two junior faculty are selected for this award, which provides \$100,000 annually for two years. The second year of funding is contingent upon the recipient meeting all the award requirements at the completion of the first year. A third year of support may be available, but it is competitive with new applicants.

At least 75 percent of the recipient's full-time professional effort must be devoted to the goals of this award. The remainder may be devoted to clinical, teaching or other research pursuits consistent with the objectives of the award. The successful candidate is expected, toward the end of the award period, to apply for grant support through NIH or other national funding mechanisms, such as K08, K23 or equivalent awards.

You should fill out the award application and requirements, which will be available in winter 2011/2012.

Applications for the Junior Faculty Career Research Training Award should be received by ASTRO's Research Department by March 29, 2012. If the deadline falls on a weekend or holiday, applications are due the next business day.

The start date for 2012 awards will be July 1.
