

Wiley Prize in Biomedical Sciences

Grantor: Wiley Foundation

Closes: 7/31/2012

Maximum: \$35,000.00

Wiley Prize in Biomedical Sciences

The Wiley Prize in Biomedical Sciences is intended to recognize breakthrough research in pure or applied life science research that is distinguished by its excellence, originality and impact on our understanding of biological systems and processes. The award may recognize a specific contribution or series of contributions that demonstrate the nominee's significant leadership in the development of research concepts or their clinical application. Particular emphasis will be placed on research that champions novel approaches and challenges accepted thinking in the biomedical sciences.

This international award is presented annually and consists of a \$35,000 prize and a luncheon in honor of the recipient. The award is presented at a ceremony at The Rockefeller University, where the recipient delivers an honorary lecture as part of The Rockefeller University Lecture Series.

The Wiley Foundation invites and encourages the nomination of exceptional scientists or research teams whose research has set the standard for excellence.

The evaluations of each nominee will depend on the information provided in the nomination packages. Therefore it is important that the nominations be as complete, current, and accurate as possible.

Deadline for submission of nominations: July 31.

The nomination should be submitted by someone other than the nominee.

More than one nomination can be made from the same organization.

International nominations are encouraged.
